1 Revise History

No.	Version	Release Time
1	2.6.10.859	2024.2.1
2	2.6.10.2345	2025.3.12
3	2.6.12.90	2025.12.31

2 Release Version 2.6.12.90

Models	Software Version	Comment
A320i	2.6.12.90	

2.1 New Features

1. Supports TLS1.3
2. Add search function to web phone book

2.2 Optimization

1. Optimize support for video preview and full screen door opening
2. Optimize support for LCD/WEB setting of video call display mode.
3. Optimize support for webpage import of restricted/allowed call in lists
4. Optimize to allow importing the same contacts from different groups
5. Optimize the secondary DNS address to 4.4.4.4
6. Optimize the removal of TLS 1.0/1.1

2.3 Bug Fix

1. Fix the issue of no video preview screen during IP calls
2. Fix the issue of occasional inability to obtain IPV6 address on the phone

2.4 New Features Description

1. Add search function to web phone book

Feature Description: Support phone web search for contacts in the phone book.

Implementation Details: No need to set up, just enter the contact person to search.

3 Release 2.6.10.2345

Models	Software Version	Comment
A320i	2.6.10.2345	

3.1 New Features

1. Support for specifying the video call display format
2. Support for hiding device IP addresses
3. Support browsing camera videos in a four-grid format
4. Support for displaying Contact Avatars in LDAP Phonebook
5. Support for displaying Card-style Contacts in LDAP Phonebook
6. Support for displaying Custom Configuration Items in LDAP Phonebook

3.2 Optimization

1. Optimize contact sorting by name on the web page
2. Compatibility with VBeT 9200 BT Bluetooth headsets
3. Optimize the input length for LDAP Phonebook Configuration Items
4. Optimize the display effect of LDAP Contact Organizational Structure
5. Optimize the display effect of the current duration in the video interface
6. Optimize Korean and Portuguese translations

3.3 Bug Fixes

1. Fix an issue where the phone occasionally crashes when connected to Bluetooth
2. Fix abnormal ringing issues on the phone
3. Fix an issue where exporting local contacts caused the phone to crash when too many contacts were stored
4. Fixed an issue where time settings became stuck when using a static IP
5. Fix an issue where manually set time failed after reboot
6. Fix an issue where the video conference display froze after multiple screen switches
7. Fix an issue causing errors during log export
8. Fix an issue where contacts could not be added after being imported on the web page

3.4 List of Known Issues

1. This version introduces a new anti-downgrade mechanism. After upgrading to version 2.6.10.2345, the device cannot be downgraded to version 2.6.10.859 or earlier.

3.5 New Features Description

1. Support for specifying the video call display format

Feature Description: The phone supports configuring the video call display as fullscreen or non-fullscreen.

Implementation Details: Adjust the video display effect by configuring parameters.

- Configuration Item: Default video mode =
- Configuration Value:

Value 0: Non-fullscreen combined display when receiving a video call (image is for reference only)

Value 1: Fullscreen combined display when receiving a video call (image is for reference only)

Value 2: Fullscreen display of the remote party only when receiving a video call (image is for reference only)

2. Support for hiding the device IP address

Feature Description: The phone supports hiding the network IP address to enhance device security.

Implementation Details: Configure parameters to hide the IP address.

- Configuration Item: Enable hidden IP address =
- Configuration Value:

Value 0: The phone displays the phone's IP address normally (default)

Value 1: The phone hides the phone's IP address

3. Support browsing camera videos in a four-grid format

Feature Description: The phone supports browsing four video streams simultaneously.

Implementation Details:

1. Select the surveillance app on the application interface to enter.

2. Choose between ① automatically searching for nearby camera devices or ② manually adding nearby camera devices.

4. Support for displaying Contact Avatars in LDAP Phonebook

Feature Description: If the LDAP phonebook server contains avatar attributes, the phone can display the contact's avatar.

Implementation Details: Enter the phone's web page, navigate to [Phonebook] - [Cloud Phonebook] - [LDAP Settings] - [Image Attr], and fill in the relevant fields for the avatar attribute. The phone will then display the contact's avatar.

5. Support for displaying Card-style Contacts in LDAP Phonebook

Feature Description: The phone supports displaying LDAP phonebook

contacts in card format.

Implementation Details: In the LDAP phonebook, the default display is in list format. You can click the icon in the top-right corner to switch to card display.

6. Support for displaying Custom Configuration Items in LDAP Phonebook

Feature Description: Adds attributes that can be displayed for contacts in the LDAP phonebook.

Implementation Details: Enter the phone's web page, navigate to [Phonebook] - [Cloud Phonebook] - [LDAP Settings] - [display attribute], and fill in the relevant attribute fields for the contacts, such as position, email, etc. Separate multiple attributes with spaces, with a maximum of 4 custom attributes supported.

4 Release Version 2.6.10.859
