No.	Version	Release Time
1	2.6.12.328	2026.04.24

2 Release Version 2.6.12.328

Models	Software Version	Comment
A320i_Broadcast & Intercom System	2.6.12.328	

2.1 New Features

1. Supports TLS1.3
2. Add search function to web phone book
3. Add the feature that supports Ukrainian, Arabic, Spanish and Polish languages.

2.2 Optimization

1. Optimize support for video preview and full screen door opening
2. Optimize support for LCD/WEB setting of video call display mode.
3. Optimize support for webpage import of restricted/allowed call in lists
4. Optimize to allow importing the same contacts from different groups
5. Optimize the secondary DNS address to 4.4.4.4
6. Optimize the removal of TLS 1.0/1.1
7. Optimize the display issues of the phone book on the web interface.
8. Optimize the low operational stability of WIFI.

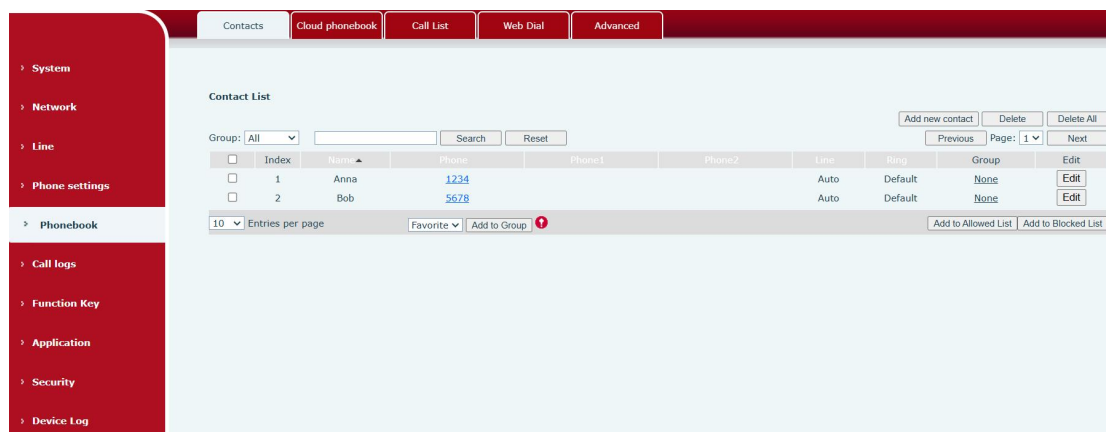

2.3 Bug Fix

1. Fix the issue of no video preview screen during IP calls
2. Fix the issue of occasional inability to obtain IPV6 address on the phone
3. Fix the issue where "Unregistered" is displayed in screensaver mode regardless of whether the SIP registration is successful or not.
4. Fixed the issue where the model names of managed extensions were incorrectly displayed as IP addresses, and there was no sound during paging and broadcasting to these extensions.

2.4 New Features Description

1. Add search function to web phone book

Feature Description: Support phone web search for contacts in the phone book.

Implementation Details: No need to set up, just enter the contact person to search.
