

## **Release Note**

**Software Version: 14.0.1.5.r1**

**Models: C400/C600**

**Date: 2018-01-29**

## 1 Optimization

---

1. Optimized the dynamic opening and closing of hand free, handle and headset amplifier.
2. Optimized support account name, function key name with special characters: **&**, **'**, **“**.
3. Optimized that when there were two incoming calls, you can only answer the first call on the web.

## 2 Bug Fixes

---

1. Fixed the issue that if the SIP info message sent to the server by two different phones has the same branch, the phone cannot answer the incoming call using the web client.
