Video SIP Door Phone Configuration

Step One: Confirm the equipment connection

Make sure the correct connections of power cord, network cable, electric lock's control wire, etc and make a normal power on startup.

Refer to status table below for device working check:

LED Icon	Description	Working Status
	DSS key LED	Always on if powered
	Network/SIP Registration	Network error: Blink with 1s Network running: Off Registration failed: Blink with 3s Registration succeeded: On
	Lock Status	Door unlocking: On Door locking: Off

Step Two: Get the IP Address

Method 1:

Use the IP scanning tool to get IP address,

- 1) Install the scanning tool which will be found in the CD of (English\iDoorPhoneNetworkScanner setup V1.0.exe).
- 2) Ensure the computer, which running the IP scanning tool, is in the same local network with the corresponding device.
- 3) Run the tool (iDoorPhoneNetworkScanner.exe) to search the IP address of corresponding device within the network.

Method 2:

Press and hold “#” key for 3 seconds and the door phone will report the IP address by voice.

(Note: when power on, 30s waiting is needed for device running. After it, method 2 can be worked.)

Video SIP Door Phone Configuration

Step Three: Log in the door phone

Input IP address (e.g. http://192.168.1.149) into address bar of PC's web browser.
The default user name and password are both admin.

A login form with a red header bar. It contains three input fields: 'User:', 'Password:', and 'Language:'. The 'Language:' field has a dropdown menu showing 'English'. A 'Logon' button is located at the bottom right of the form.

Step Four: Add SIP account

Set SIP server address, port, user name, password and SIP user with assigned SIP account parameters. Select <enable registration>, click <Apply> to take effect.

The SIP configuration page has a red sidebar with navigation links: BASIC, NETWORK, VoIP, INTERCOM, DOOR PHONE, MAINTENANCE, and LOGOUT. The main content area has tabs for SIP and STUN. The SIP tab is active, showing 'SIP Line' set to 'SIP 1'. Below is the 'Basic Settings >>' section with the following fields: Status (Registered), Server Address (172.18.1.88), Server Port (5060), Authentication User (8005), Authentication Password (*****), SIP User (8005), Display Name (8005), and Enable Registration (checked). An 'Apply' button is at the bottom right. Below the basic settings is the 'Advanced SIP Settings >>' section, which is currently empty.

Step Five: Set DSS key

Set the DSS key as below for a quick start. Click <Apply> to take effect.

Type: Hot Key.

Number1: the DSS Key will dial to.

Number2: call will be forwarded to, if number1 is unavailable.

Line: working line.

Subtype: Speed Dial.

The DSS key configuration page has a red sidebar with navigation links: BASIC, NETWORK, VoIP, INTERCOM, DOOR PHONE, MAINTENANCE, and LOGOUT. The main content area has tabs for FUNCTION KEY, MEDIA, DND, FEATURE, MCAST, and Action URL. The FUNCTION KEY tab is active, showing a table with 7 columns: Key, Type, Number 1, Number 2, Line, Subtype, and Media. There are four rows of configuration.

Key	Type	Number 1	Number 2	Line	Subtype	Media
DSS 1	Hot Key	602	192.168.2.100	SIP1	Speed Dial	DEFAULT
DSS 2	Hot Key			SIP1	Speed Dial	DEFAULT
DSS 3	None			SIP1	None	DEFAULT
DSS 4	None			SIP1	None	DEFAULT

An 'Apply' button is located at the bottom right of the table.

>Cards management

1.Add user cards

Method 1: used to add cards for starters typically

- 1) In web page <Door card\Card Reader Setting> option, select <Card Issuing> function.

Card Reader Setting>>

State: Card Issuing Apply

Administrator Table>>

- 2) Click <Apply>, Card Reader would be entered the issuing status.

Submit Success

Return

- 3) Use new card to touch card reader induction area, and then you might hear the confirmed indication tone from the device. Repeat step 3 to add more cards.
- 4) In web page <Door card\card reader Settings > option, select <normal> function.

Card Reader Setting>>

State: Normal Apply

Administrator Table>>

- 5) Click <Apply>, Card Reader would be back to the Normal status.
- 6) The issuing records can be found from the door card table list.

Door Card Table

Total: 3 Page: 1 Pre Next Delete Delete All [Right Click here to Save Door Card Table](#)

Index	Name	ID	Issuing Date	Card State
1	Ada	0004770424	2015/10/20 11:20:56	Enable
2	joe	0000477117	2015/10/20 11:21:12	Enable
3		0003408920	2015/10/20 11:21:25	Enable

Apply

Methods 2: use to add few cards

- 1)Input cards number in door card settings page, and then click <Add>.

Add Door Card

ID: Add

Note: you can also use the USB card reader connected with PC to get cards ID automatically.

Video SIP Door Phone Configuration

Method 3: used to add cards for professionals

- 1) Use <Issuer admin card> to touch card reader induction area, and it would be entered issuing card status.
- 2) Use new card to touch card reader induction area, and you might hear the confirmed indication tone from the device. Repeat step 2 to add more cards.
- 3) Use <Issuer admin card> to touch card reader induction area again, it would be back to normal working status.

Note: please refer to user manual for <admin card> information.

2.Add access settings

- 1) Add a new access rule

Fill the user stuff as below and click <Add> to take effect.

Add Access Rule

Name	Xiaoming Chen	Department	market	Position	employee
ID	0004770424	Time Profile	None	Access Type	Guest
Access Code	Remote Call and Local Auth	8888		Double Authentication	Disable
Location	6001	Phone Num	8239	Forward Num	8240

Access Rule	
Setting Item	Function
Name(necessary)	User name
ID	RFID card number
Time Profile	Valid for user access rules (including RFID, access code, etc) within corresponding time section. If NONE is selected, it would be taken effect all day.
Access Type	Host: the door phone would answer all call automatically. Guest: the door phone would be ringing for incoming call, if the auto answer had been disabled.
Access Code	1/ When the door phone has been answering the call from below <Phone Num> user, then the <Phone Num> user can input the access code by keypad to unlock the door remotely. 2/ The user's private password for local door unlocking by door phone's keypad.
Double Authentication	When enabled, private password inputting and RFID reading must be matched simultaneously for door unlocking.
Location	Virtual extension number, used to make position call instead of real number. It might be taken with unit number, or room number.
Phone Num	User Phone Number
Forward Num	Call forwarding number when above Phone Num is unavailable.

Video SIP Door Phone Configuration

2) Access Table

Access Table													
Total: 1		Page: 1	Pre	Next	Delete		Delete All	Right Click here to Save Access Table					
Index	Name	ID	Department	Position	location	Number	Fwd Number	Access Code	Double Auth	Access by Call	Access by Psw	Profile	Type
1	Xiaoming Chen	0004770424	market	employee	6001	8239	8240	8888	Disable	Enable	Enable	None	Guest

Application for above access rules:

- a) 0004770424 RFID card for local door unlocking.
- b) Private access code inputting of 8888# for local door unlocking.
- c) Public password inputting of 6789# for local door unlocking. (Default public local password is 6789.)
- d) Door phone has been answering the call from 8239 SIP phone and the user of 8239 input 8888 by SIP phone keypad for remote door unlocking.
- e) Door phone makes a call to 6001 or 8239. The user answers the call and input * by SIP phone keypad for remote door unlocking. (Default remote password is *.)
